

ANNOUNCEMENTS 2008

15 Dec 2008	GRANT OF OPTIONS	<p>Lo-Q announces that it has today granted options over 180,000 ordinary shares of 1p each in the Company ("Shares") under the Lo-Q EMI Share Scheme, exercisable at 38.5p per Share, to the Chairman Jeff McManus.</p> <p>A consideration of £1 was paid in respect of the grant.</p> <p>The options will vest in four tranches (three tranches of 50,000 Shares and one tranche of 30,000 shares) subject to the achievement of certain performance targets in relation to the average mid-market price of the Company's Shares, on or before 31 December 2011. Any vested options shall expire on the 10th anniversary of grant.</p> <p>Enquiries:</p> <p>Lo-Q plc, Jeff McManus t: 01491 577 210</p> <p>Arbuthnot Securities, John Prior/ Ed Burbidge t: 020 7012 2000</p>
1 Dec 2008	Lo-Q plc agrees 1 year trial of its VQ2020 queue management system in Australian Theme Park, Dreamworld	<p>Lo-Q plc, the leading supplier of virtual queuing systems to theme parks, today announces that it has agreed a one year trial of Lo-Q's VQ2020 system with the Australian Theme Park, Dreamworld. Dreamworld is located in Coomera (south of Brisbane), Queensland. The Park will be running the system from 15th December 2008 and it will allow virtual queuing on the park's major attractions. The VQ2020 system uses Q-bots to enable park visitors to wait for a ride without having to wait in line. The Q-bot is used to make ride reservations from anywhere in the park.</p> <p>Lo-Q's systems are currently deployed in 8 Six Flags Parks throughout the USA, Dollywood in Tennessee, USA and LEGOLAND® Windsor (UK), with over one million guests having used the system during 2008.</p> <p>Noel Dempsey, CEO of Dreamworld Theme Park said: "Thousands of visitors enjoy a day out to Dreamworld throughout the season. We are delighted to partner with Lo-Q on their "True Virtual Queuing Solution".</p> <p>Lo-Q's Sales Director, Colin Robertson commented: Dreamworld is an important step for Lo-Q. It illustrates that our system is truly international and can be deployed anywhere in the world quickly and efficiently. We are delighted that Dreamworld have chosen Lo-Q to be its partner and we are committed to ensuring that our solution continues to be fair to everybody in a theme park that uses the system.</p> <p>For further information, please contact:</p> <p>Lo-Q plc, Jeff McManus 01491 577 210</p> <p>Arbuthnot Securities Limited, John Prior/Ed Burbidge 020 7012 2000</p>
25 Nov 2008	Director's shareholding	<p>Lo-Q announces that it was informed on 24 November 2008 that on the same day, Anthony Bone, Non-Executive Director of the Company, purchased 50,000 ordinary shares of 1p each at 38p per share. Mr Bone's resultant share interest comprises 381,517 ordinary shares, representing approximately 2.49% of the Company's issued ordinary share capital.</p>

Trading
statement

Further to the announcement on 22 September 2008, the Company announces that trading since this announcement date has been ahead of management expectations, with the Company's financial performance being further assisted by the continued strength of the US Dollar.

Results for the 12 months ending December 31 2008 will therefore be significantly ahead of market expectations, with profit before tax expected to be no less than £1.85million.

Jeff McManus, Chairman of Lo-Q, commented:

We are very pleased that the strong performance of the business has continued into the final part of the trading season, which is traditionally a quiet period for the Company. We will be announcing the final outcome of the year to the market in the week commencing 19th January 2009.

Further
extension and
enhancement
of Six Flags
Agreement

Lo-Q plc ("Lo-Q" or "the Company") the leading supplier of virtual queuing systems to theme parks today announces it has signed an extended agreement with Six Flags, Inc.

The agreement provides for Lo-Q's VQ2020 system to be installed into a further two Six Flags parks, which would bring the number of Six Flags parks which use the Lo-Q system to ten.

The first of these additional parks, Six Flags Magic Mountain, is in the top three of Six Flags US theme parks by number of visitors, with the Lo-Q's system scheduled to be in operation by December of this year. It is intended that Lo-Q's system will be installed in to the second park in time for next seasons opening.

The Lo-Q agreement with Six Flags has also been extended for all parks until 31 December 2012.

Lo-Q's managing director, Leonard Sim commented:

"We are delighted that Six Flags have chosen to extend our agreement for a further two years and to introduce our system into additional theme parks. Six Flags brands Lo-Q's system as the 'Flash Pass' and, during 2008, over a million people have enjoyed the experience. We very much look forward to continuing to work with Six Flags over the coming years"

Lo-Q joins the
iConnect
Partner
Program

Lo-Q joins the Irisys iConnect Partner Program as an Approved Solutions Partner focusing on delivering queue management solutions to the Theme Park industry

Lo-Q plc, the world's leading supplier of dynamic virtual queuing systems to the theme park and related market places, has today joined the Irisys iConnect Partner Program.

Says Leonard Sim, Executive Director of Lo-Q, "We get people out of queue lines so they can spend the time waiting for their ride enjoyably – in restaurants, shops, playing games or just relaxing. Our intelligent VQ2020 system does not give a "jump to the front of the line" problem to the parks but manages a guest's ride reservations to give him a more relaxed fun-filled day, without impacting other guest's waiting times. Together with our theme park customers we have been looking for a solution to enhance our system by more accurate measurement of waiting times in the queues for the rides. After evaluating the market and a number of tests, we have chosen to partner with Irisys, who are recognized as the world's leading manufacturer of people counting technology, and we expect this relationship to bring us fresh opportunities."

Says René Schrama, Irisys' Sales Director for People Counting, "We are very pleased to welcome Lo-Q into our partner program. Their unique queue management solution for theme parks is a perfect example of the innovative spirit we seek in our partner base. Combining our people counting technology with the patented Lo-Q solution will surely be received with great interest in the Theme Park sector and we are looking forward to launching this jointly into the market."

The solution will be officially launched at the IAAPA ATTRACTIONS EXPO 2008 which takes place 17 to 21 November in Orlando, Florida, USA.

-end-

About Irisys

InfraRed Integrated Systems Ltd, specializes in the development and manufacture of intelligent infra-red detectors used in people counting, queue management, thermal imaging, healthcare and security applications. Founded in 1996, Irisys is based in Northampton, UK with offices in the US. For more information, visit www.irisys.co.uk

22 Sept
2008 Trading
 Statement

Further to our interim announcement on 15 August 2008, trading has continued to be very strong during the remainder of the summer months, which has resulted in heightened sales volumes of Q-bots in the existing parks when compared to last year. Furthermore, the two new parks, which started operating this year, are now performing at or beyond expected trading levels.

This had fed through to a strong financial performance, which has been further strengthened by increased Q-bot rental prices when compared to last year, and the strengthening of the US Dollar.

Mark Shapiro, President and Chief Executive Officer of Six Flags Inc., our major customer, reports that he is very pleased with both Lo-Q's operation this year and the revenue generated by the Flashpass, the name through which the Q-bot is known in Six Flags parks; and believes that the Flashpass is now an established part of the Six Flags brand.

Following the end of the main trading season in the theme parks in which Lo-Q has its systems installed, Lo-Q reports that results for the year ending 31 December 2008 will be significantly ahead of current market expectations, with unaudited profit before tax at the end of August standing at in excess of 100% of market forecasts. Actual final results will be determined by the relatively small level of trading expected during the remainder of the year.

Jeff McManus, Chairman of Lo-Q, commented:

We are very pleased with the financial and trading performance of the business. After having been available in theme parks for over 7 years now, Q-bots are now becoming a cultural normality for theme park visitors, demonstrating that we have a robust business going forward.

2008 Interim
 results

Interim results - 2008 first half year (available on our News page)

13 June
2008 Annual
 Report and
 Accounts

The Company notifies that its Annual Report and Accounts for the year ended 31 December 2007 were posted to shareholders on 18 April 2008 and are available at www.lo-q.com

23 April 2008 DIRECTORS DEALING Lo-Q has today been notified that on 22 April 2008 Jeffrey McManus, Chairman, sold 90,000 ordinary shares of 1p each in the Company ("Shares") at 24.5p per Share, and on the same day the Mr McManus's SIPP and the SIPP of his wife each purchased 45,000 Shares at 24.5p per Share.

Following these transactions Mr McManus's interest in the Company remains unchanged at 953,414 Shares, representing approximately 6.2% of the Company issued ordinary shares.

11 April 2008 GRANT OF OPTIONS Lo-Q announces that it today granted options over ordinary shares of 1p each in the Company ("Shares") under the Lo-Q EMI Share Scheme, exercisable at 25p per Share, to certain directors as follows:

Director	Options granted (1)	Options granted (2)	Exercise price	Resultant option holding
Jeffrey McManus	100,000		25p	100,000
Steve Drake	100,000		25p	295,921
Leonard Sim	100,000		25p	100,000
Colin Robertson	100,000	100,000	25p	200,000

A consideration of £1 was paid in respect of each grant.

(1) These options will vest in four equal tranches on the 1st, 2nd, 3rd and 4th anniversaries of the grant, subject to the achievement of performance targets for the financial years 2008, 2009, 2010 and 2011, and expire on the 10th anniversary of grant.

(2) These options may be exercised from 11 April 2009, and expire on the 10th anniversary of grant.

10 April 2008 2008 RESULTS

Preliminary Results for the year ended 31 December 2008

Chairman's Report

For The Year Ended 31 December 2007

I am pleased to report that the company made progress on all fronts in 2007 with a second year of operating profit. Our profit before tax for 2007 was £551,235.

As our staff are responsible for collecting the Q-bot rental from park guests in all of the major customer's parks in which we operate, the profit and loss statement this year includes the total income that is derived from these daily rentals. The value of our sales, at over £7 million, illustrates the advances that the Company has made in recent years with annual growth running in the region of 40% for each of the last three years.

Based on our in depth experience over six years of operation, we have established a minimum useable life of all the major components of the system, including software, of five years. We have therefore agreed with our auditors to write down the capital and research and development cost of upgrades over a matching five-year basis. As previously required by the accounting standard we were writing off the costs as they occurred.

The introduction of the new VQ2020 system into our major customer's parks in Chicago and Montreal, Canada was well received by the parks' guests. The ability to book rides using the Q-bot, from any where in the park, rather than

from a booking station, has proved very popular.

We have also enhanced the Q-bot's operating system so that the guest can reserve shows as well as rides, and we installed this upgraded software into Dollywood.

All credit is due to our development and installation teams for getting the systems up and running in all these parks, in time for the start of the 2007 season.

In 2008 our systems are now in an eighth major customer's park, in San Antonio, Texas, as well as LEGOLAND® Windsor. With the introduction of the Text-Q system in Drayton Manor on a trial basis, we have increased the number of parks in which we operate by 40%.

As well as selling more of the upgraded VQ2020 systems we hope to be selling more Text-Q systems this year. Our ability to offer potential customers a choice of line management solutions is proving to be quite beneficial.

We are currently talking to a number of different companies in terms of product cross-integration and we expect these discussions will be of medium and long-term benefit.

We look forward to a successful summer season in 2008.

Appointment
of Sales
Director

The Board of Lo-Q plc is pleased to announce the appointment of Colin John Robertson (51) to the board as Sales Director.

Colin has been working with Lo-Q as a consultant to the company since August 2007 and joined on a full time basis at the beginning of February this year.

Previously Colin was in charge of the UK and Ireland Operation of Avnet Inc. He has an excellent track record in system sales over the last 25 years.

Colin Robertson currently holds 148,000 ordinary shares of £0.01 in Lo-Q.

There are no other disclosures under paragraph (g) of Schedule Two of the Aim Rules.

LO-Q wins
first European
theme park
installation of
its VQ2020
queue
management
system

Lo-Q plc today announces it has reached agreement with Lego Windsor Park Ltd for the use of its VQ2020 queue management system. The two year extendable agreement provides for the operation of the system from March 15th this year.

The LEGOLAND® park is part of the Merlin group, which is a major global player in the theme park market. Lo-Q's Text-Q product is already in use at the London Dungeon and other Merlin venues.

VQ2020 is Lo-Q's flagship product and was introduced last year to capitalise on Lo-Q's extensive operational experience and in-house system development capabilities. Park visitors who use the system employ a proprietary, hand held, wireless unit, the Q-bot, to make reservations for their favourite rides from anywhere in the park. The true virtual queuing employed in VQ2020 means that all visitors wait the same time for the ride so the Q-bot system is fair

to all.

Vicky Brown, General Manager of LEGOLAND® said: "Our new system allows our park visitors to avoid physically waiting in the queue line for our major rides. Our park is aimed at the under 12 age group, and they will especially enjoy having the Q-bot wait in the queue for them. The Q-bot is a key part of our objective of giving our visitors an even more enjoyable experience.

Lo-Q's Managing Director, Leonard Sim, said: "It is really exciting for us to have one of our systems operating in the UK, and we are particularly pleased to work with LEGOLAND®. We expect the system to be well received by visitors to the park, and look forward to it contributing to our revenues for the year ending 31 December 2008.

Text-Q trial
agreement
with
Drayton
Manor Theme
Park

Lo-Q plc today announces it has agreed with Drayton Manor Theme Park to run a trial of its Text-Q queue management system in the early summer.

Text-Q is Lo-Q's mobile phone based reservation system, and it will be available to be used by Drayton Manor's visitors between May 31st and June 8th 2008.

Lo-Q acquired the Text-Q Technology from Avius Technology Ltd in November of last year and this is the first installation of the system in a theme park although the system has been in use in other venues in the last twelve months.

Lo-Q's Managing Director, Leonard Sim, said: "We are very pleased to establish a relationship with this prestigious park"

Edward Pawley, General Manager Park Operations of Drayton Manor Theme Park said: "The advanced technology of the Text-Q system allows our park visitors to make reservations for a number of our major rides using their mobile phone from anywhere in the park.. The visitors no longer need to stand in line, providing for an even more enjoyable experience. We look forward to a successful trial leading to a long term relationship with Lo-Q."

Directors'
shareholdings

The Company received notification that John Lillywhite and Tony Bone, directors of the Company, have today exercised options over 209,000 ordinary shares of 1p each in the Company ("Shares") and 182,875 Shares respectively, all at an exercise price of 3.5p per Share.

The Company also received notification that today Mr Lillywhite and Mr Bone have sold 104,500 Shares and 91,437 Shares respectively at 18p per Share in order to realise sufficient funds to settle the resultant tax and national insurance liability arising as a result of the exercise of their options.

As a result of the above transactions, Mr Lillywhite's interest comprises 145,500 Shares, representing 0.9 per cent. of the enlarged issued share capital of the Company, and Mr Bone's interest comprises 331,517 Shares, representing 2.12 per cent. of the enlarged issued share capital of the

Company.

The Company also received notification today that Jeff McManus, Chairman of the Company, purchased 50,000 Shares at a price of 18p per Share, and that Steve Drake, director of the Company, purchased 20,000 Shares at a price of 18.5p per Share. As a result of these purchases, Mr McManus is now interested in 953,414 Shares representing 6.2 per cent. of the enlarged issued share capital of the Company, and Mr Drake is now interested in 234,384 Shares representing 1.53 per cent. of the enlarged issued share capital of the Company.

Application has been made for the 391,875 new Shares to be admitted to trading on AIM. The new Shares will rank pari passu with the Company's existing issued Shares. Admission is expected to take place on 6 February 2008 ("Admission").

Total Voting Rights

In accordance with the FSA's Disclosure and Transparency Rules, the Company notifies that upon Admission the Company's total issued share capital with voting rights will consist of 15,321,101 ordinary shares of 1p each, with one voting right per share. The Company holds no shares in Treasury.

The above figure may be used from Admission by shareholders in the Company as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change in their interest in, the share capital of the Company.

Arbuthnot Securities Limited

28/1/2008 Trading
Update

Following its year end on 31 December 2007, Lo-Q is pleased to provide the following update to the market.

The Company installed the new VQ2020 guest queuing system into three theme parks during the spring of last year, including Dollywood, and the systems worked successfully during the whole season in their new operating environments.

As announced earlier this month, the extension of our agreement with Six Flags Inc provides for installation of the VQ2020 system into four more of the existing parks, as well as into a new park, Six Flags Fiesta Texas, for the 2008 operating season. Should the new system be successfully installed into these parks, this will result in all but one of the 8 Six Flags parks using the VQ2020 system.

The enhanced technology and functionality of the VQ2020 system results in it being a more attractive product to theme park guests and we expect to derive increased revenues from it compared to its predecessor.

The Company will look to increase the marketing of its products during the coming year, with the aim of winning additional theme park operators as

customers, and expanding the number of operators adopting the Text-Q system, which was acquired by the Company in November 2007.

The Company anticipates reporting a pre-tax profit for the year ended 31 December 2007 marginally in excess of £500,000, an increase of at least 46 per cent on the normalised pre-tax profit for the prior year. Cash balances at 31 December 07 are estimated at £620,000.

The Company will announce its results for the year ending 31 December 2007, the week commencing 14 April.

18/1/2008 Extended and enlarged Six Flags contract Lo-Q plc announces extension and enhancement of Six Flags agreement

Lo-Q plc ("Lo-Q" or "the Company") today announces it has signed an extended agreement with Six Flags, Inc.

Lo-Q's new VQ2020 system will be installed in an additional Six Flags park, Six Flags Fiesta Texas, for the 2008 operating season which will increase the number of Six Flags parks employing the Company's queuing systems for 2008 to eight. It is anticipated that this will grow to nine for the 2009 park operating season.

Lo-Q plans to replace its existing product with its new VQ2020 system in four of the existing parks before the start of the 2008 park operating season bringing the number of Six Flags parks using the VQ2020 system to seven.

The Lo-Q agreement with Six Flags has been extended for all parks until 2010.

Lo-Q is among the select group of companies who enjoy sponsorship opportunities in the Six Flags parks. Other current Six Flags sponsors include: Nintendo Wii, Kraft, Kodak and Papa John's.

Lo-Q's Managing Director, Leonard Sim, said: "We are very pleased to strengthen our relationship with our major customer, particularly given the positive feedback from Six Flags guests and the continued growth of Q-bot use."

Six Flags' Executive Vice President, In-Park Services, Andrew Schleimer, commented: "The advanced technology in our new system allows Flash Pass users to see the wait times for their favourite attractions and make their reservations using their new Flash Pass unit from anywhere in the park. The VQ2020 system continues to eliminate the need for guests to stand in line, providing for an ever further enjoyable experience. We look forward to working with Lo-Q throughout the upcoming seasons."
